Description

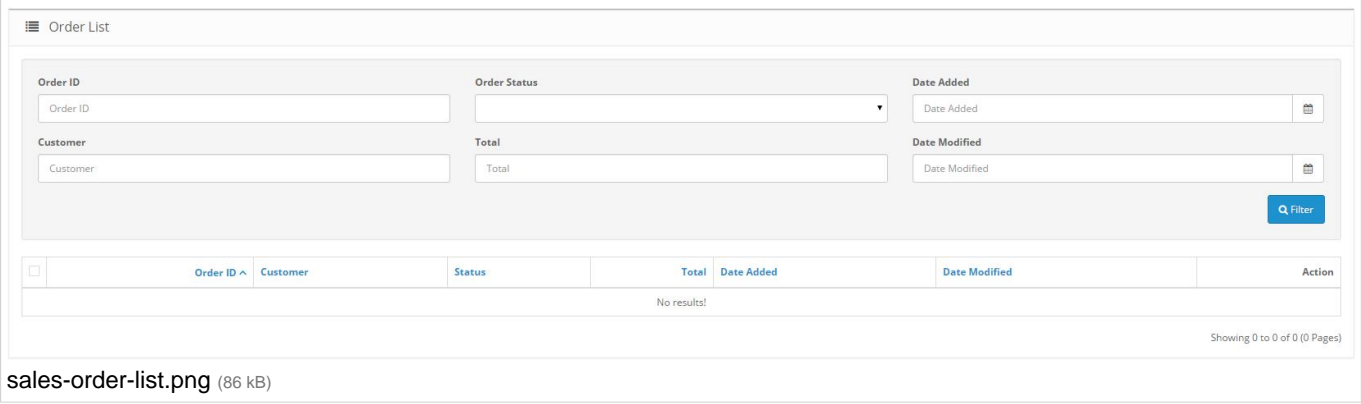

The Orders section is located under Sales > Orders. On this page, every order ever made from the store is listed in detail.

The following details are displayed for each order on the list:

- Order ID: a number assigned to an order by OpenCart during the checkout confirmation
- Customer: the name of the customer that made the order.
- Status: update of the status of the order. After the order is initially created the status will be "Pending". The default options are Missing Orders, Canceled, Canceled Reversal, Chargeback, Complete, Denied, Expired, Failed, Pending, Processed, Processing, Refunded, Reversed, Shipped, and Voided.
- Total: the total price of the order.
- Date Added
- Date Modified

With the orders included in the list, there is an option to edit, insert, delete, search, or print an invoice of an order.

Description

The "Filter" button under Action helps you find orders based on the information specified in the blanks. It can help you locate orders by date added or customer. The "Filter" cannot search for orders by product purchased yet. For more information on the [Filter](#) tool, see Filter.

Description

Customer Orders will be automatically updated to the Order section after a customer confirms checkout. Though it is automatically updated, you may want to edit or add orders manually to add new information such as a gift-voucher, or add reward points. To manually add a new order, click the "Add New" button.

The screenshot shows the OpenCart admin dashboard. The 'Orders' section is active, and the 'Add New' button is highlighted with a yellow box. The interface includes a navigation menu on the left with 'Dashboard' and 'Catalog' options. The main content area shows the 'Order List' table with a 'Filter' button. The top right corner displays the user 'demo demo' and a 'Logout' link.

Attachments

This is a duplicate of the screenshot above, showing the OpenCart admin dashboard with the 'Add New' button highlighted.

Confirm

Expected result: If the total order is greater than \$100.000.000.000, then the value both in the order and in the 'Order List' table should correspond and remain the same.

Actual result: a successful message appears for the new added order in the 'Order List' table, but the Total value of the order seen in the 'Order List' table compared

to the Total value of the order seen in the 'Add Order' page - they do not correspond and it is modified in the 'Order List' table (here it cannot exceed the value of \$100.000.000.000).

<i>Agile</i>	
Sprint:	BAMM Sprint 1

Environment

- tested on playground environment

Description

Preconditions:

1. Access link page https://demo.opencart.com/admin/index.php?route=sale/order&user_token=64d6352a63beb6394ae2d618504c33bb
2. Login with valid admin account.

Steps to reproduce:

1. Navigate to 'Sales' menu item, 'Orders' sub-menu page.
2. Click on the checkbox in the left corner of the table to select all orders.
3. Click on 'Delete' button from 'Orders' page.
4. Click 'OK' on pop-up window.
5. A Success message appears: 'You have modified orders!'.

Expected result: all orders from 'Order List' table should be deleted.

Actual result: a successful message appears as if you had deleted all orders, but only the orders from the first page are actually deleted .
